

A recent Queensland snap inspection of our facilities at Wulkuraka conducted by Queensland Government WH&S inspectors resulted in our receiving the maximum possible rating on every aspect of this inspection. This was the first time that the inspector had ever awarded this score to any company and clearly demonstrates a thoughtful, well implemented system.

This also reflects our recognition as meeting the ISO Safety standard also and its integration into our Quality and Environment management system. It is a pleasing recognition of the ongoing efforts from everyone in the team and the commitment of our company to ensuring world class outcomes which has included zero Lost Time Incidents for more than a year throughout all group companies.

The performance demonstrates the effectiveness of the Company's integrated management systems which are internationally accredited for Safety, Quality and Environmental outcomes.
