

Aquatec Maxcon is proud to be associated with Local Buy through the Local Government Association Arrangement for the Supply of Products & Services for the provision of Road, Water, Sewerage & Civil Works (BUS270).

What is Local Buy?

The purpose of Local Buy is to provide Councils and other approved Purchasers with a straightforward procurement process. Purchasers will be provided with a choice of service providers who possess a strong regional presence - leading to the development of competitive local businesses, thus providing commercially competitive rates. Local Buy contracts allow clients to access the services we offer quickly and efficiently.

Why sell to Local Government?

Queensland councils are responsible for building and maintaining a large range of assets including roads, libraries, parks and gardens, leisure centres and waste facilities. In achieving this objective, Queensland local government entities spend approximately \$12 billion on operating and capital expenditure and manage over \$108 billion in total assets each year.

Goods and services accessed by Queensland councils each year include fuel, corporate wardrobe, pumps, sewer relining services, trucks, weighbridges and legal services.

Why do government purchasers use Local Buy?

A contractual arrangement established by Local Buy enables councils and local government authorities to purchase a diverse range of goods and services from Local Buy suppliers without tendering. While councils and local government authorities are not legally bound to use Local Buy's services, purchasers using Local Buy arrangements save significant time and money.
